Subject: CHANGE IN FM116 FAN MOTOR KIT

Effective January 24, 2002 there will be a change in the fan motor kit FM116. The bracket that comes with this kit will be eliminated. This bracket is only used in early model KM-250BAB units built in 1990 and beginning of 1991.

FM116 (Current)				FM116 (Future)		
Description	Part #	Qty		Description	Part #	Qty
Fan Motor	440911-01	1		Fan Motor	440911-01	1
Bracket	327754-01	1		Capacitor	443192-01	1
Nuts	7N21I0832	4				
Capacitor	443192-01	1				

We will also offer the HS-021 Fan Motor Kit that should be used exclusively for the KM-250BAB with serial numbers K1, K2 and A0. Note: The capacitor 443192-01 must be ordered separately.

HS-021		
Description	Part #	Qty
Fan Motor	440911-01	1
Bracket	327754-01	1
Nuts	7N21I0832	4

This change will help eliminate the unnecessary waste of the additional bracket sent with FM116, which is not used in most applications. If you have current FM116 fan motor kits in stock there is no problem with using them until your inventory is depleted.

NOTE: In the past if you ordered an HS-021 kit it was subbed to the FM116. This will no longer be the case. You will receive the HS-021, which does not include a capacitor. So you should be careful to only order the HS-021 if needed.

If you have any questions about this change please feel free to contact the Technical Support Department at 1-800-233-1940
