Subject: CONNECTOR KITS FOR REMOTE LINE SETS

There are two new HS kits available in the event that remote lines sets must be field fabricated or if it is necessary to replace the line set ends. These kits are sold as sales accessories.

The **HS-2150** replaces the former “OS QUICK” kit. This kit includes one large fitting (Parker #10) and one small fitting (Parker #6) with straight tubing and one large fitting (Parker #10) and one small fitting (Parker #6) with 90° tubes. The kit also includes various couplings/reducers which will allow the kit to be used on any KM remote series unit with standard quick connect fittings.

The **HS-0231** is a new kit that will be used for the KMS series of Serenity cubers (Excluding the KMS-822). This kit includes two large fitting (Parker #10 and #8) with a straight tubing and two large (Parker #10 and #8) with a 90° tube.

Both of these kits include a tube of Parker Super O Lube and detailed instructions for proper installation. It is important that the instructions are followed to insure proper installation and refrigerant seal. Reference Service bulletin SB08-0004R

If you have any questions on the application or instructions for these kit please contact Technical Support at 1-800-233-1940. For price and availability please contact your local Hoshizaki distributor.
