Subject: HS-2015 FLUSH TIMER REPLACEMENT KIT

The HS-2015 Flush Timer Kit is the replacement kit for previous Flaker flush timers, 2U0094-01, 4A0889-01 and HS-2011. This is the mechanical cam timer used to initiate the flush cycle.

This kit consists of a new pre wired timer, instructions, miscellaneous mounting and installation hardware. The instructions include a new wiring diagram to be used to properly connect the new timer. See the tables below for additional wiring connections.

Note: There may be two Black wires that are permanently connected to the coil/motor of the old timer. Trace these two wires; one will lead to a wire nut containing (Red) wires. This black wire should be removed or capped off. The other black wire will lead to a wire nut containing LBU wires. This wire should be connected to # 3 on the new timer.

ALL DCM'S and Flaker			ALL F-2000M	
Wiring Connections			Wiring Connections	
Old Timer	New Timer		Old Timer	New Timer
BLK/LBU	#3 LBU		BLK/LBU	#3 LBU
RED	#1 RED		RED	#1 RED
VIOLET	#4 VIOLET		GRAY	#2 ORANGE
ORANGE	#2 ORANGE		ORANGE	#4 VIOLET
Note: Other Black wire leading to red bundle will not be used.			Note: Other Black wire leading to red bundle will not be used
