Subject: Lower Housing 206013G03 now subs to 383613G01

The lower housing 206013G03 used in the 45 diameter Flaker/DCM evaporators has been changed to 383613G01. This new housing contains a high strength brass bearing with imbedded lubricant.

This new housing and bearing can be used in existing units as well as future production. This new sleeve bearing cannot be re-pressed in the field. The extruding head (top bearing) material will not change.

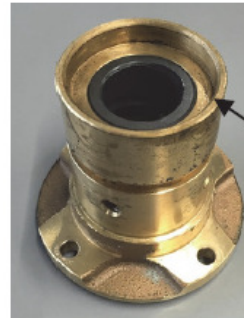

It is important to note that in the event that an auger needs to be replaced, the extruding head, lower housing, mechanical seal and seal bolts must be replaced.
