Subject: Inlet Water Valve Data

Below is a listing of the available inlet water valves for current and past production models. The water valves are listed by their part number and their manufacture code which is stamped on the body of the valve for quick identification. The flow data listed is the design flow of the valves. There are external factors that can affect the performance of the valves. In a case where low water flow has been confirmed the entire installation of the unit must be checked along with the inlet water valve screen and water filter system prior to condemning the part.

Part Number	Code	Flow – L/min	Flow - gpm	Diaphragm	Filter Screen
