Revised April 25, 2024

Page 1 of 2

### **Subject: Stackable series design changes**

There have been several changes to the water circuit on the stackable series of KM cubers. These changes include replacing the cleaning valve and drain valve with electric solenoid valves.

Additional changes include the water pump is now using a single outlet and the board has been updated to the K+ board 2A9678-01.

These changes also include some minor changes to the operation and an automated cleaning process. For more details on the cleaning function please reference the instruction manual. [KM-1301 1601 1900 2200 2600S J\(Z\)\(3\) inst.pdf \(hoshizaki.com\)](#)

Note: These changes are not interchangeable with previous models and serial numbers. It is important that part numbers be ordered by serial number. See the table on the second page for information on starting serial numbers.

Parts and service manuals are in the process of being updated.
