## **SERVICE BULLETIN**

**SB92-0001**

January 31, 1992

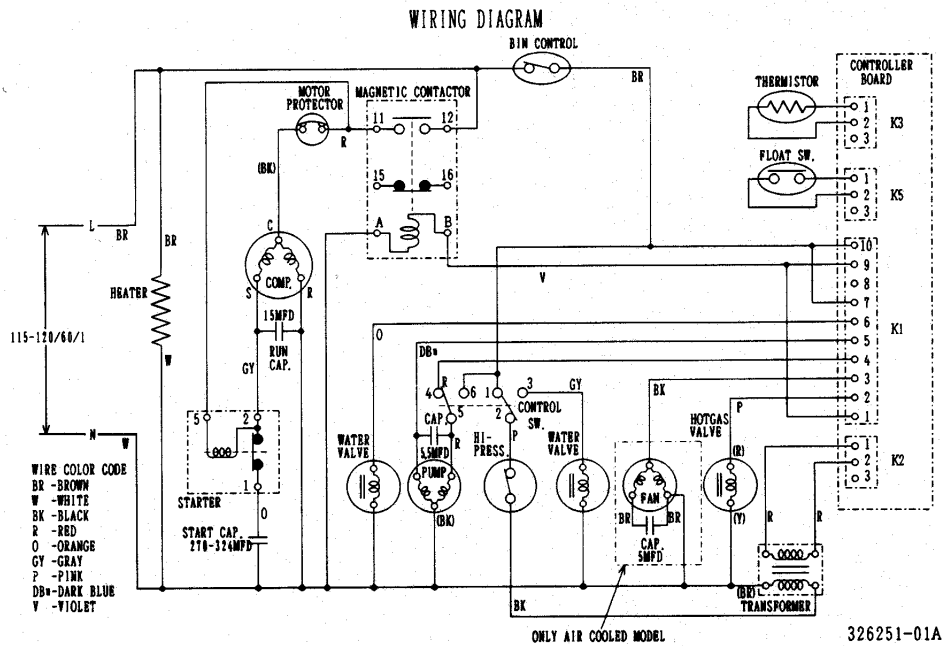

**SUBJECT: WIRING DIAGRAMS FOR ALPINE BOARD UNIT**

With the change to the domestic Alpine control board, you will find that the wiring diagrams have changed. The protect relay is eliminated due to internal safeties in the transformer and the cleaning valve interlock switch is added. The Alpine board is easily distinguishable by the red connector, (which is not used) and the eight dip switches. The Alpine board wiring diagram is also very distinguishable because the K2 connector for the transformer is shown at the bottom of the control board and it contains no protect relay.

Included in this bulletin you will find Alpine wiring diagrams for all KM models. Please update your Service Manuals and Service Keys with these new drawings.

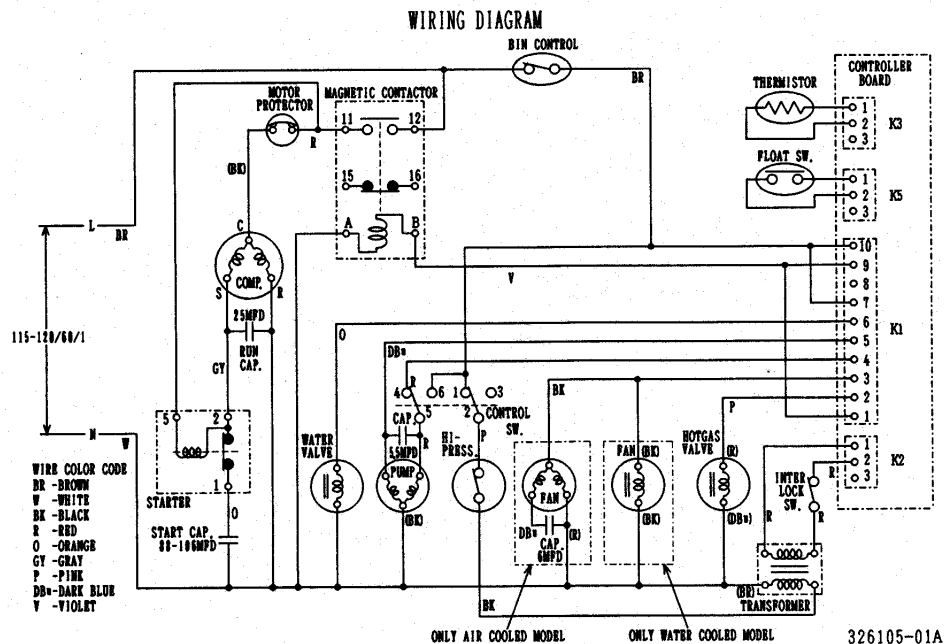

# Alpine Board Wiring Diagrams

KM 250 BAB / BWB

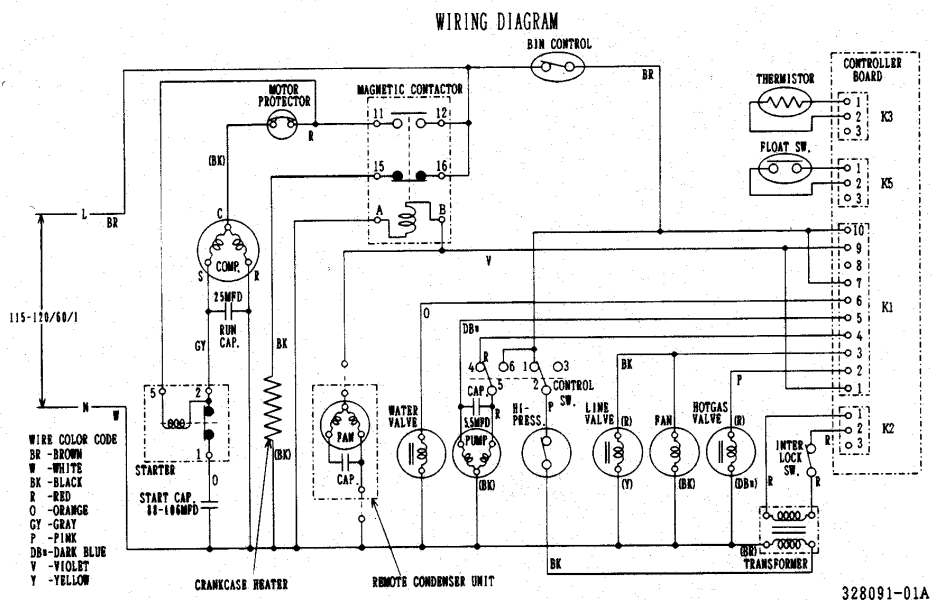

KM 250 MAB / MWB ( no condenser or compressor fan on MWB model )

KM 450 MAB / MWB

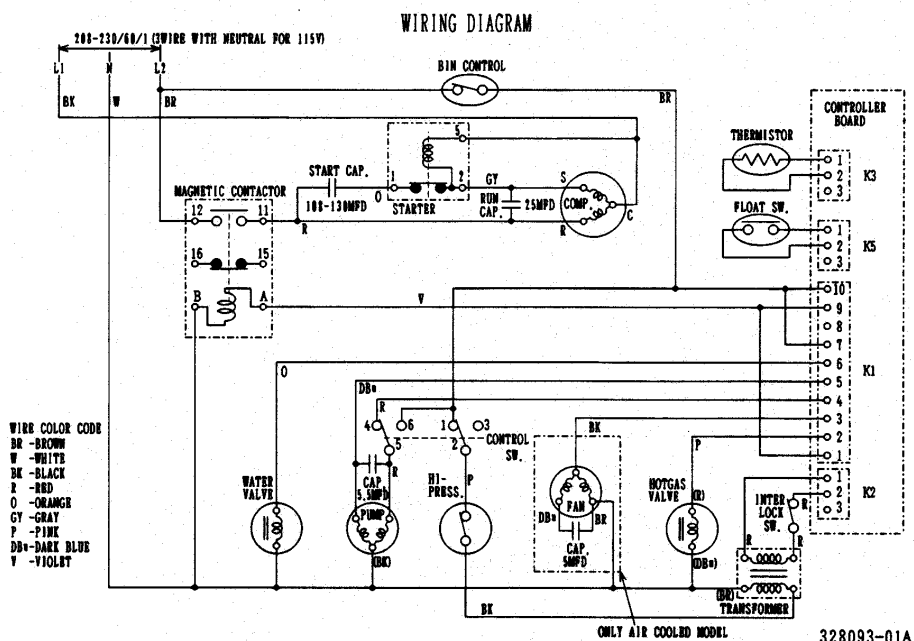

# Alpine Board Wiring Diagrams

## KM 450 MRB

## KM 630 MAB / MWB

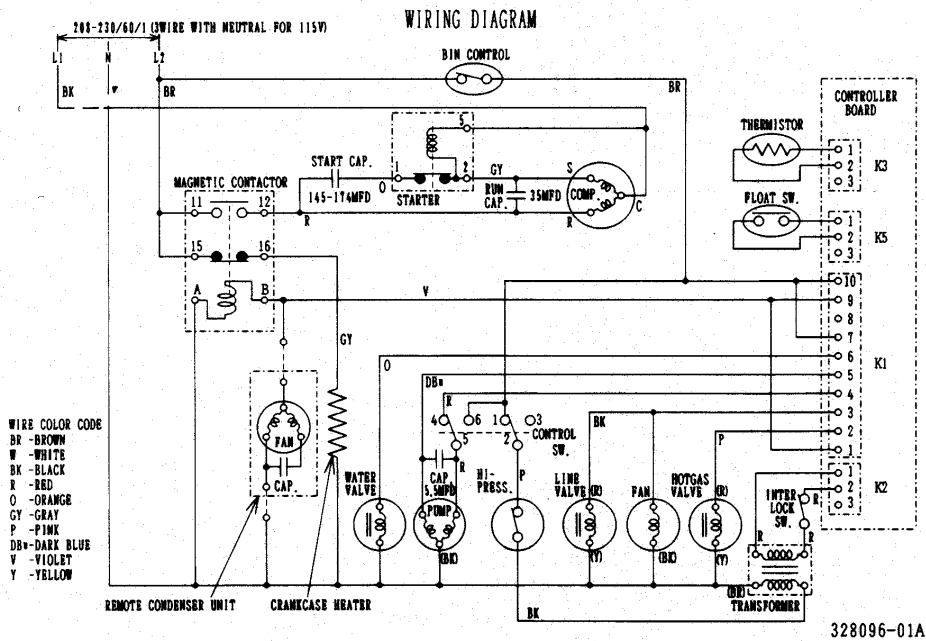

## KM 800 MAB

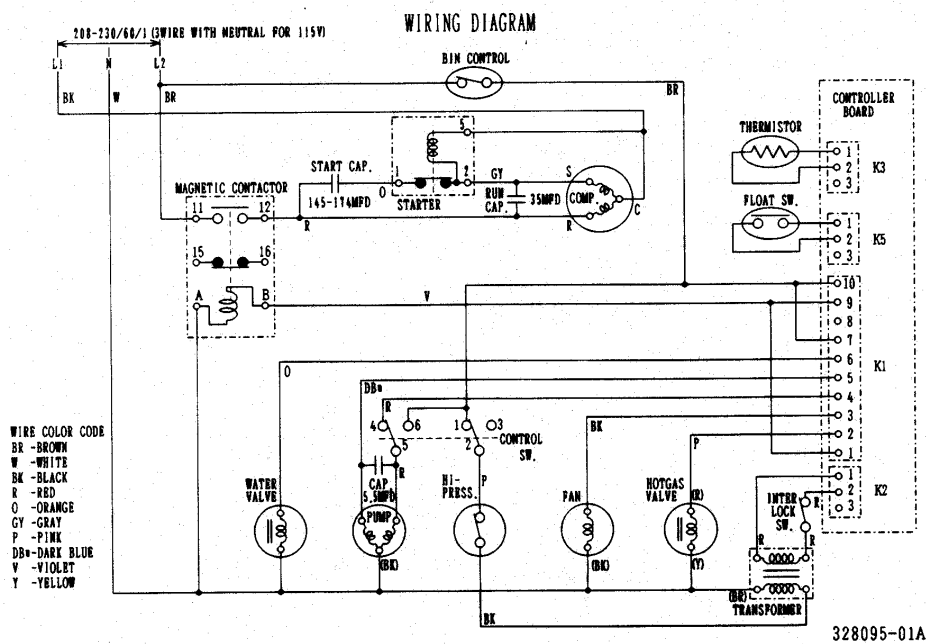

# Alpine Board Wiring Diagrams

KM 630 MRB

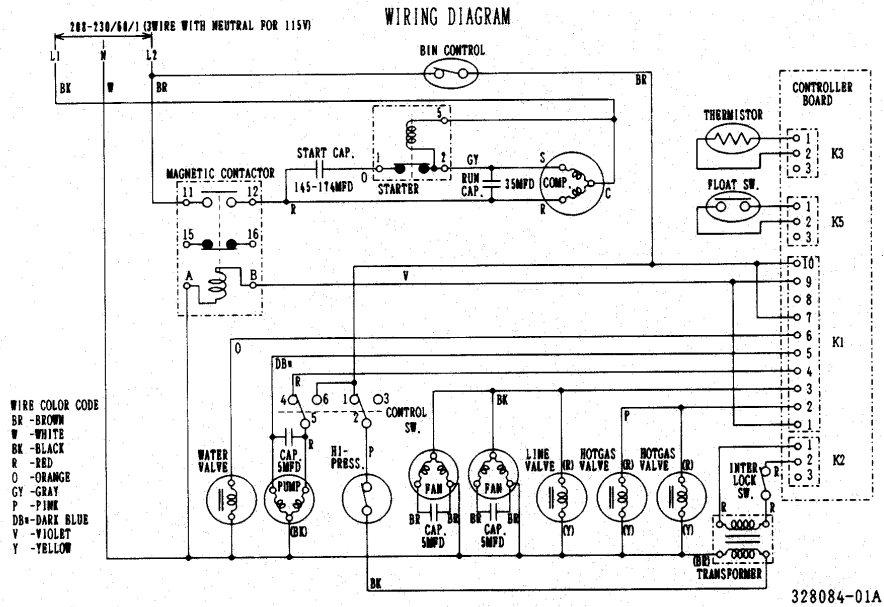

KM 800 MRB

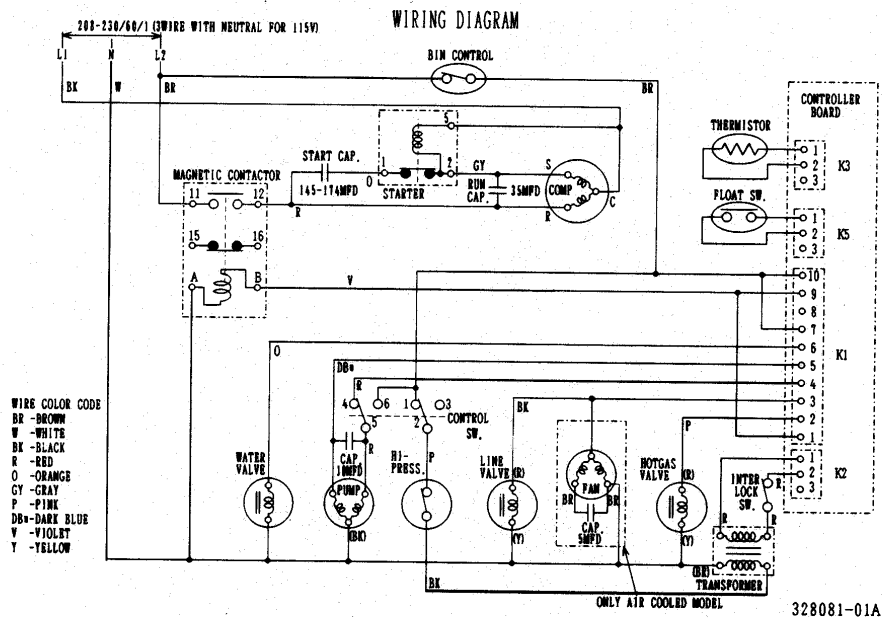

KM 800 MWB

KM 1200 MAB

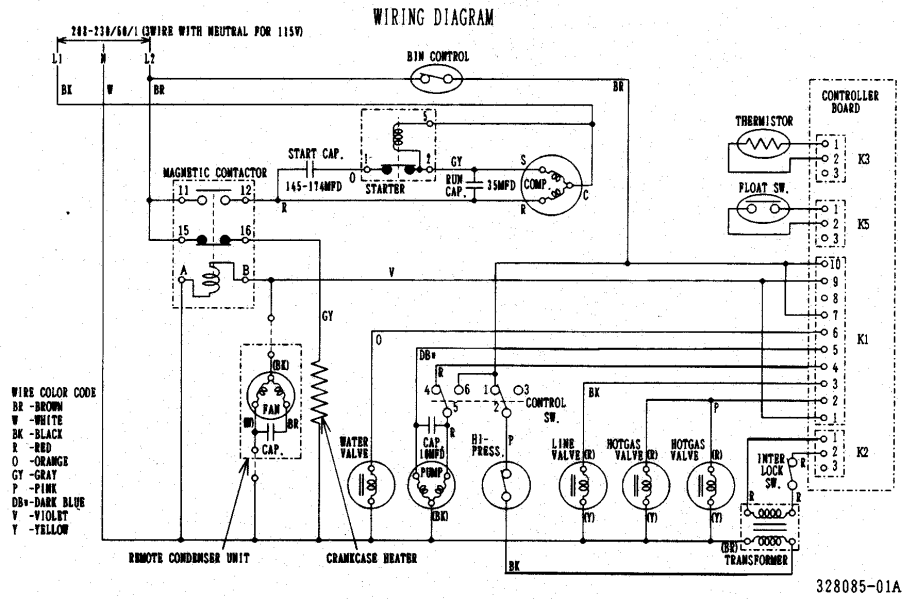

KM 1200 SAB / SWB KM 1200 MWB ( has 2 hot gas valves on pin 2)

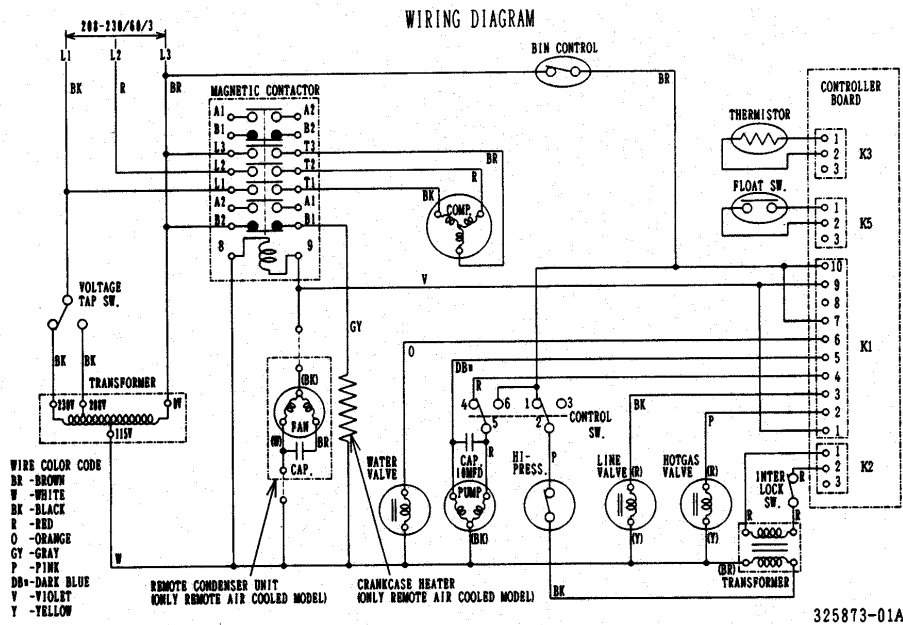

# Alpine Board Wiring Diagrams

KM 1200 MRB KM 2000 SWB / SRB (utilizes 1 hot gas valve on pin 2)

KM 1600 MWB3 / MRB3  
KM 2000 SWB3 / SRB3

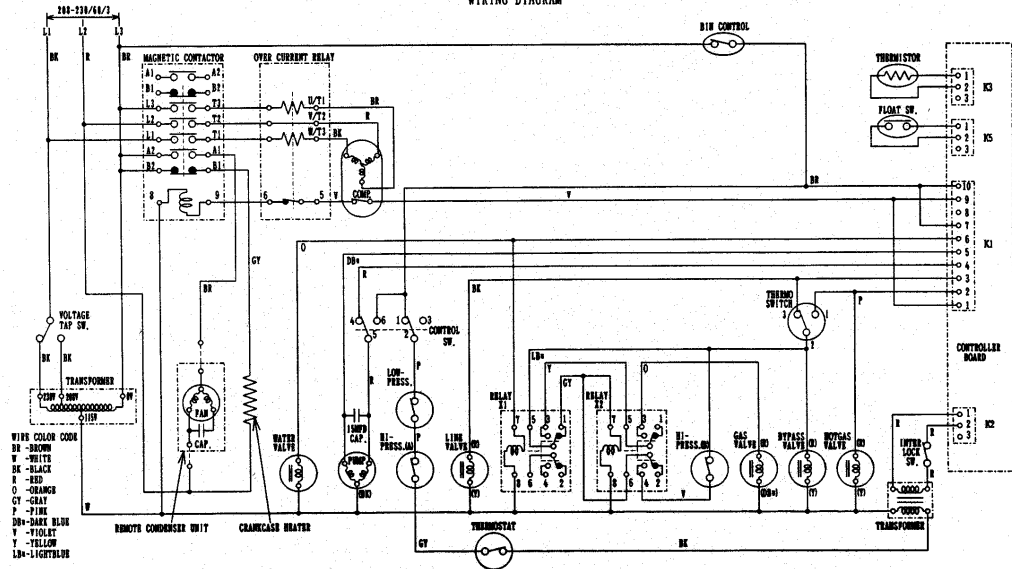

KM 1600 SWB3 / SRB3
