## SERVICE BULLETIN

**SB93-0004R**

**April 27, 1995**

**SUBJECT: KM-450 COMPRESSOR CHANGE**

Copeland Compressor model number JSL5-0075-CAA has been changed to a Copeland model number RSF5-0075-CAA. (Hoshizaki part number 444624-01) This change is effective on all KM-450M series units with serial numbers beginning with "C1".

We began shipping the RSF5 compressor as a replacement part on February 1, 1993. New start components are shipped with the RSF5 compressor and must be installed for proper operation. Also, 2 notice labels are included with the instructions. These labels must be attached to the unit to notify future service personnel of the compressor change. When ordering replacement start components, order part numbers per the notice label or the list below.

You will also note that this compressor will be used to replace the JSL5 used in the F-650. This unit will continue to be manufactured with the JSL5 compressor unit until it is converted to R-22 refrigerant.

Each Hoshizaki part number 444624-01 kit contains the following:

(1) Compressor	444624-01
(1) Start Relay	434172-04
(1) Start Capacitor	3A0076-06
(1) Run Capacitor	439943-05
(1) Drier	427061-02
(2) Labels	NPN
(1) Instructions	NPN

Follow the instructions provided with the kit to perform the compressor change out and recheck the compressor wiring before start up.

Contact the Care Department with any questions concerning this replacement.
