Subject: HOSHIZAKI SERIAL NUMBER CODE

This is a revised version of SB93-0010. The purpose of this revision is to clarify the serial number code and how it correlates to year and month of production.

To comply with a UL request, in 1993 we added a month code to our serial number. We also implemented the use of a twenty-year serial number cycle however; this did not take affect until the year 2001.

The standard Hoshizaki Serial number is a letter, 5 digits and a letter:

Note: "T" and "O" are omitted
Started back at "A" in 2011
on a 20 year cycle.

1 = A or L
2 = B or M
3 = C or N
4 = D or P
5 = E or Q
6 = F or R
7 = G or S
8 = H or T
9 = J or U
0 = K or V

Example: Serial Q10005L was produced in November of 2005
Serial T12501M was produced in December of 2008
Serial B25003A was produced in January of 2012
